Developer passionate about learning and problem solving using web technologies.Experience in Front-End Development and UI design.
I have built several wordpress templates for small business. Looking at a design I can convert it into a HTML CSS JavaScript template with pixel perfect precision. I use bootstrap when needed to help turn around projects timeline, and always use Git in collaboration with Github to track my progress and files.
Currently I'm learning react and looking for a position where i can progress and challenge my skills.
